## SPIRIT OF THE SEASON

FASHION TIME is 4 styles of your life in colour and materials.

4 fashion moments which take an optimistic approach to the trends for fall-winter 2012-2013.

Time to act, have fun, dream, seduce and delight in each moment, and enjoy the marvellous originality of fashion!

## COLOURS & TEXTURES

Colour is more than ever the key element in the coming season.

It optimises the evolution of our style... every moment of the day.

Vivid colours, alone or teamed up with others, are the stars of the season.

Neutrals and naturals evolve, taking a sophisticated, romantic and glamorous turn.

And as a contrast, subtle chiaroscuro effects, in which shadows glorify the light.

Materials are sublimated: luxury, quality, airiness and voluptuousness have pride of place.

New, sophisticated textures, with clever effects.

Finishings and trims in metal, copper, delicate gold, platinum or colour brighten up matt materials.

Sumptuous textures.

3D effects and other innovative finishings transcend the classical looks in an exciting modern way.
